

TEETH WHITENING

TREATMENT INFO

Bekker Dental & Aesthetics' preferred whitening treatment process is Phillip's Zoom Whitening. The results are absolutely fantastic & many happy clients can vouch for this.

Below more info is shared regarding the two available treatment options:

OPTION 1 | IN-CHAIR & HOME-KIT TEETH WHITENING

The professional teeth whitening treatment is performed by the dentist, in-chair, and the handover of the client's at-home / maintenance kit also takes place during this appointment.

Includes:

- 2 x In-Chair Zoom Whitening Sessions - completed during one 60-minute appointment.
- 1 x At-Home Maintenance Kit incl. custom-made mouthguard / whitening trays and 2 x whitening gel syringes - fitted & handed over during the same, above-mentioned appointment, approx. 7 days after the initial consultation.

Excludes:

- Check-up & cleaning (scale & polish) is a 30-minute appointment inclusive of a complementary teeth whitening consultation. This is the first step and is required to be booked & completed before any teeth whitening procedure can be performed, as it ensures the viability and longevity of the whitening treatment(s). During this appointment, the dentist will do the necessary checks to ensure the client is a viable candidate for the teeth whitening treatment & will discuss the procedure in a bit more detail. Clients are welcome to claim this portion of the treatment from their medical aid, should their chosen benefit plan cover dental. The rest is however deemed cosmetic and is generally not covered and thus for the client's own account.
- Additional at-home whitening gel refills / syringes are available from reception, if & when needed in the future.

OPTION 2 | AT-HOME TEETH WHITENING

This teeth whitening treatment is performed by the client in the comfort of their own home. Unlike many other, the at-home kit is however custom-made and fitted to ensure the absolute best results.

Includes:

- 1 x At-Home Whitening Kit incl. custom-made mouthguard / whitening trays and 2 x whitening gel syringes - fitted & handed over during a 15-minute follow-up appointment, approx. 7 days after the initial consultation.

Excludes:

- Check-up & cleaning (scale & polish) is a 30-minute appointment inclusive of a teeth whitening consultation. This is the first step and is required to be booked & completed before any teeth whitening procedure can be performed, as it ensures the viability and longevity of the whitening treatment(s). Clients are welcome to claim this portion of the treatment from their medical aid, should their chosen benefit plan cover dental. The rest is however deemed cosmetic and is thus not covered & for the client's own account.
- Additional at-home whitening gel refills / syringes, which are available from reception, as & when needed in the future.
- Any in-chair teeth whitening treatment(s).

To obtain any further info on the Zoom whitening product itself, you are welcome to visit Philip's Zoom Whitening website.

BUT, YOU DON'T HAVE TO TAKE OUR WORD FOR IT, HEAR IT FROM THE MAN HIMSELF - RENOWNED ACTOR, PRESENTER, MC, WRITER, DIRECTOR & PRODUCER - THE LIST GOES ON & IT SURE IS IMPRESSIVE.
